

# **Model SPT** Amplified Output Pressure Transducer

#### DESCRIPTION

The Model SPT general purpose industrial pressure transducer is designed for everyday use in a variety of industries and applications. All wetted parts are 316 stainless steel, making the SPT perfectly suited for applications where media compatiblity is a problem. Featuring superb stability, low cost, and proven reliability, it's the transducer of choice for OEM applications.

The SPT provides a high level voltage output from an unregulated supply. Each unit is shipped fully compensated for pressure and temperature and is completely interchangeable without the need for further calibrations. Rugged construction and a standard Packard electrical connector make it truly cost effective.

#### SUPPLY

Excitation: 8 to 15 VDC

### **ACCURACY**

Null Offset (at 25° C): 1 VDC ± 2% span

Span (at 25° C): **5 VDC ± 1% span** 

Accuracy: ± 0.25% span from best fit straight line

(includes repeatability, hysteresis, non-linearity - BFSL)

Stability: ± 0.25% span/year

Thermal Effect on Zero (Null): ± 0.5% span (typical) over compensated temperature range, 2% max

Thermal Effect on Span: ± 0.5% span (typical) over compensated temperature range, 2% max

Thermal effect error is calculated with respect to 25°C and expresses the deviation that could occur as

temperature is raised or lowered to limits indicated.

#### **■TEMPERATURE RANGE**

Operating Temperature Range: -40 to 105° C

Compensated Temperature Range: -5 to 55° C

### **ENCLOSURE**

Shock: 50 g; MIL-STD-202F, Method 213B Condition A

Weight: 73 grams

Electrical Terminations: Packard connector #12162189 with 18 inch leads; 20 AWG

Media Compatibility: 316/316L stainless steel wetted parts

Humidity: 0% RH to 95% RH, non-condensing; MIL-STD-202F, Method 103B, Condition A

Protection Class: **IP64** 

Process Connection: 1/8 NPT

#### **APPLICATIONS**

- Refrigeration
- Compressors
- Pumps
- Hydraulic systems
- Pressure instrumentation

- Engine monitoring / control
- Engine testing
- Pneumatic systems
- Flow control
- Automotive vehicle testing

## RESPONSE TIME

< 20 milliseconds

# OUTPUT IMPEDANCE

> 50K ohms

# **Model SPT** Amplified Output Pressure Transducer

#### PRESSURE RANGE

Maximum Overpressure: 2x full scale

Burst Pressure: **3x full scale or 12,500 psi, whichever is less** 

### **MODEL NUMBERING**

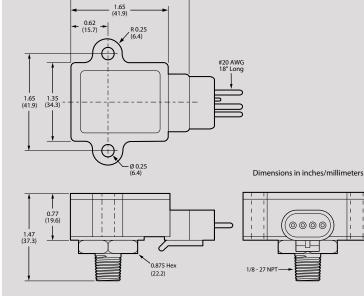

Model	Pressure Range	Input/Output	SAMPLE PART NUMBERS
SPTG	——	——	SPTGV010E Vacuum to 10
	Vacuum to 10 psig <b>VO10</b>	8-15 VDC/1-6 VDC <b>E</b>	with input of SPTG3000E 3000 psi press input of 8-15
	Vacuum to 35 psig <b>V035</b>		
	0-25 psig <b>0025</b>		
	0-50 psig <b>0050</b>		
	0-100 psig		
	0-200 psig		
	0-500 psig		
	0-1000 psi 1000		
	0-2000 psi <b>2000</b>		
	0-3000 psi 3000		
	0-5000 psi 5000		

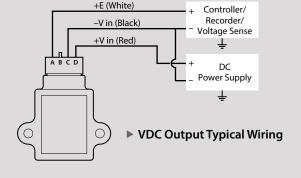

SPTGV010E . . . Vacuum to 10 psig pressure transducer with input of 8-15 VDC and output of 1-6 VDC.

PTG3000E . . . 3000 psi pressure transducer with input of 8-15 VDC and output of 1-6 VDC.

# **FEATURES**

- 316/316L stainless steel wetted parts for maximum media compatibility
- 3x burst pressure rating standard
- 0.25% accuracy
- Excellent stability
- Solid state / Industrial grade
- Temperature compensated
- Rugged VALOX housing provides outstanding corrosion resistance
- 11 standard pressure ranges from vacuum to 5000 psi
- Amplified output (1-6 VDC standard)
- Unregulated supply requirement (8-15 VDC)
- Vacuum and compound pressure ranges available
- Automotive-style Packard connector

The SPT features a solid state silicon piezoresisitive sensing element, electrostatically bonded to glass to virtually eliminate the effects of induced stress and vibrations. Behind every SPT series transducer is over 15 years of stainless steel/oil isolation technology. The silicon sensor is completely isolated from the corrosive effects of harsh media via an oil-filled chamber.
